Test Quiz Survey

Version 11 Results File Layout

Results File Layout

There are four (4) record types in the results (.out) file. Each uses ^A (ascii 1) as the field separator (<FS>). Record types 1-3 all have seven(7) fields, record type 4 has four(4) fields. The standard record format is:

KEY<FS>Record Type<FS>F1<FS>F2<FS>F3<FS>F4<FS>F5

Check Out Record (Record Type 1)

This record is generated when the module is displayed to the respondent.

F1	Module Name
F2	Signin ID
F3	TimeStamp
F4	Interation Count. The number of times this respondent has seen this module.
F5	If Proctored this is the ProctorPassword used to unlock the module. If not proctored, this is either the HTTP_X_FOWARDED_FOR ip address (for use with proxies) or REMOTE_ADDR ip address of the remote user.

Response Record (Record Type 2)

These records are generated when the respondent responses have been submitted. One record is generated for each question asked of this responde

F1	Question Number as it appears in the question file. (1, 2a, 3, 101, etc.)
F2	Question weight. A numeric value.
F3	Code (r|w|l|e|gradedessay) R=right W=wrong L=likert E=essay Gradedessay = Essay has been graded by the inquisitor.
F4	Grade for this question
F5	Answer. In various forms depending on the question type. Essay questions have returns converted to ^B for storage in the file.

Check In Record (Record Type 3)

These records are generated when the respondent responses have been submitted. Only one record is generated for each returned module.

F1	Duration in seconds
F2	Number of questions this respondent saw
F3	Total Possible points
F4	Number of Points Right
F5	Score

Special Timelimit Record (Record Type 4)

This record is generated at the same time as Record Type 1 if the special time limit feature is enabled at the hosting site. This feature allows for disabled students to automatically receive additional time (in the manner of a time factor) to take inQsit modules.

F1	Time limit for this individual for this module

Special Checkout Record for Blind Studies (Record Type 5)

This record is only generated for blind studies when you want to keep track of how many times an individual has responded.

F1	Module Name
F2	Signin ID (encrypted)
F3	TimeStamp
F4	Interation Count. The number of times this respondent has seen this module.
F5	" "
